**Subject:** RE: Reporter DTN/Progressive Farmer re: glyphosate review

Hi Emily,

Yes, it does have to do with my research. I was a member of the World Health Organization International Agency for Research on Cancer (IARC) working group that classified glyphosate as a probable human carcinogen. I, however, only worked on the exposure component of the monograph and was not present at the deliberations where the classification was assigned.

One reason the reporter is reaching out to me is that EPA's own cancer review group also assessed glyphosate and concluded that it is not likely to be a carcinogen. I am one of "four top EPA officials" (with Matt Martin of NCCT being another) involved in one or both reviews of glyphosate (<http://www.reuters.com/article/usa-glyphosate-epa-idUSL1N18Z1I2>) that the U.S. House of Representatives Committee on Science, Space and Technology wants to interview to determine how U.S. Environmental Protection Agency staff may have influenced findings by the World Health Organization.

And yes, Jennifer Orme-Zavaleta (and Tom Burke) are aware of the Congressional activities.

Thanks,

Peter

Peter P. Egeghy, Ph.D. M.P.H.

Hi Peter – Does this report have anything to do with your research? If not, we can have someone else from EPA respond to this. I'm copying Brad because I'm leaving the office shortly and will be out of the office tomorrow.

Brad, once we hear back from Peter about my question, can you please go ahead and forward this to Megan Maguire for her to connect with the EPA press office?

Thank you!

-Emily

**Importance:** High

Hello Emily,

Who do I forward this to and how do I procede? I'm not really interested in commenting on "a story about a House committee's investigation into the inadvertent release of a final report."

Thanks,

Peter

Peter,

My name is Todd Neeley and I'm a reporter with DTN/Progressive Farmer in Omaha, Nebraska. I'm writing a story about the Cancer Assessment Research Committee's work on glyphosate. I wanted to give you a chance to comment on a story about a House committee's investigation into the inadvertent release of a final report. In particular, the committee has been asking for information from EPA regarding CARC's interactions with the IARC in France. We wanted to give you a chance to comment. Please feel free to reach me at this email address. Thank you for your consideration.

Sincerely,

**Todd Neeley**
